Daiki Yamamoto

Senior Machine Learning Engineer

Tokyo, Japan
+81 90-1588-1839
yamamotodaiki760@gmail.com

Summary

Senior AI/ML Engineer with 9+ years of experience designing, deploying, and scaling production machine learning systems for e-commerce, fintech, and enterprise services. Proven record of building high-throughput recommendation and real-time inference infrastructure, establishing MLOps practices that keep models performant in production, and delivering NLP and computer vision solutions that drive revenue and operational efficiency. Bilingual Japanese–English engineer experienced in leading cross-functional teams and mentoring engineers in global organizations.

Experience

Senior AI/ML Engineer *CyberAgent, Inc. · Tokyo | Sep 2023 – Present*

- Architected and launched recommendation engine infrastructure that serves hundreds of millions of daily user interactions while meeting sub-millisecond latency targets, directly improving personalization and conversion across the e-commerce platform
- Built and operated ML platforms for demand forecasting, dynamic pricing, and customer behavior prediction, enabling real-time, personalized shopping experiences at scale
- Established end-to-end MLOps practices, including feature stores, automated retraining, A/B testing frameworks, and model versioning, ensuring continuous model performance and faster iteration cycles
- Delivered NLP and computer vision solutions for product catalog enrichment, search relevance, and fraud detection across multiple regional markets
- Re-architected core data processing pipelines, reducing latency by 55% and improving reliability of downstream inference services
- Led migration of ML workloads to a cloud-native Kubernetes platform on AWS, improving scalability and deployment consistency
- Mentored junior engineers through their first production ML deployments, raising team delivery capacity and code quality

Machine Learning Engineer *Embarc · Yokohama | Jun 2020 – Sep 2023*

- Developed NLP models supporting bilingual Japanese–English business communication and translation, enabling seamless collaboration between international clients and Japanese partners
- Designed intelligent document processing systems combining OCR and NLP to automate corporate incorporation documentation and regulatory compliance workflows
- Built ML pipelines that automated accounting coordination, payroll administration, and bookkeeping, reducing manual workload and improving accuracy for enterprise clients
- Deployed chatbot and intelligent routing solutions for online customer support, improving response times and client satisfaction
- Collaborated with operations, translation, and consulting teams to integrate AI capabilities into daily business operations

AI Engineer *Computools. · Nagoya | Apr 2017 – Jun 2020*

- Developed machine learning models for client solutions including hospital RFID equipment tracking, energy-sector drone analytics, and AI-based agricultural monitoring, contributing to significant gains in tracking speed, uptime, and productivity

- Built predictive analytics features for digital banking and POS platforms that contributed to a 25% increase in client retail sales
- Enhanced an IoT platform with AI capabilities for real-time printer monitoring and automated consumables replenishment
- Designed and deployed cloud-based AI solutions across AWS, Azure, and GCP for enterprise and mid-market clients
- Delivered AI-driven automation for CRM and sales enablement, improving operational efficiency and customer experience
- Worked within distributed, multinational teams to deliver scalable solutions for global clients

Education

Master of Computer Science *Tokyo University | 2016 – 2017*

Bachelor of Computer Science *Tokyo University | 2012 – 2016*

Skills

- Machine Learning & AI
  Recommendation Systems · Learning-to-Rank · Demand Forecasting · Dynamic Pricing · Customer Behavior Modeling · Anomaly & Fraud Detection · Natural Language Processing · Large Language Models & RAG · Computer Vision · OCR & Intelligent Document Processing · Predictive Analytics
- Frameworks & Libraries
  Python · PyTorch · TensorFlow · scikit-learn · XGBoost / LightGBM · Hugging Face Transformers · spaCy · OpenCV · pandas · NumPy
- MLOps & Model Lifecycle
  Feature Stores (Feast / SageMaker Feature Store) · MLflow · Kubeflow · Model Registry & Versioning · Automated Retraining Pipelines · A/B Testing & Experimentation Frameworks · Model Monitoring & Drift Detection · CI/CD for ML (GitHub Actions / GitLab CI)
- Serving & Infrastructure
  Real-Time & Low-Latency Inference · Kubernetes · Docker · Helm · TorchServe / Triton · FastAPI · REST & gRPC APIs · Microservices
- Cloud Platforms
  AWS (SageMaker, EKS, Lambda, S3, Redshift) · Azure (Azure ML, AKS) · GCP (Vertex AI, GKE, BigQuery)
- Data Engineering
  Apache Spark · Apache Kafka · Airflow · SQL · Data Warehousing · Streaming & Batch Pipelines · ETL Design
